## About Us

Qatar Technology Networks is an information Technology Solutions and Services Organization. Providing a host of value added, State of art end to end solutions in the IT arena. Our policy is to continuously endeavor to provide higher value and better solutions to our clients.

Ours is an organization dedicated to our client's need. Together we strive to bring out the best Our Customized software solutions are efficiently engineered that suits the best to streamline our clients business and increase Process life cycle.

## Approach

### Technology Evaluation

Our specialists benchmark your operating system, communication protocols, or application code technology to determine whether the performance is sufficient for your product's demands.

### Architecture Review

We fully review your architecture, match theoretical ideas with the design, and review the various project phases to identify potential roadblocks at an early stage. With our understanding of technology, we will recommend & design an efficient architecture for you.

### Tool Selection

We help you determine which tools will be most effective for your project, and at which phases. We help you select the tools you need, to maintain peak productivity

## Partners

We have partnered with the best of technology, product and solution providers. They complement our strengths in solution design, development and implementation, to offer complete end-to-end solutions to our clients.

The competency of our team has also been recognized and certified by cable manufacturers or principals, namely Krone, Panduit, AMP and Belden as enterprise partners in related fields. Through our business partners, we re-assure our clients in providing a complete customer satisfaction through our state of art products technologies.

## Networking Solutions

We provide comprehensive network solutions including consultancy, network designing and Implementation to our valued customer. Our major solutions include LAN, WLAN, WAN, Network Server Setup and others. Products which are installed by us are Cisco, 3Com and D-Link.

We provide Krone, Panduit, AMP, Belden, etc cabling design, installation, testing and commissioning. These include the installation of cables, ducting, wall plates, patch panel, cable management, earthing system, equipment rack and etc. We are a certified installer of KRONE Panduit, AMP and Belden products.

## Our Services

Our engineering professional have expertise in Data & Voice Cabling with proven efficiency. Out team skills have been certified by CISCO, CCNA, MCSE etc.

### Our Information Technology services broadly cover the following

- Data & Voice Structure Cabling
- Optical Fiber Cabling With Splicing & Termination
- PABX Systems Digital & Analog
- Wireless Networking System
- Voice Mail & Dial Guard Systems
- Security IP Camera Installations
- Access Control Systems
- Time Attendance Recording System
- Telephone Call Monitoring System
- Door Access Control & Time Attendance System
- CTV Installations

Incorporated with a vision to "Create a world class IT Organization" In terms of PEOPLE, PROCESS & TECHNOLOGY and to become a globally respected corporation, by providing high quality Services and products to its customers in its chosen technical segment. Our focus placed on software solutions has expanded its portfolio of services to include local and wide area networking, networking maintenance And retain the best IT talents in the industry to develop state of the art IT solutions as per global requirements.

We creates an environment for continual improvement of quality in all our products, services and business areas and to create a work culture for individual excellence & innovations for making our presence significant in domestic & international emerging Technologies.
